We are honored to announce a new partnership through the academic exchange agreement signed on 2019.3.10 with Taipei Chinese Medical Association in Taiwan. According to this agreement, we will deepen the exchange of research and education through faculty members and students exchange programs.

Taipei Chinese Medical Association was founded in 1950 as a clinical and research association of Chinese medical doctors and now having over 1,000 members in it. The Association is managing seminars, annual conferences, publishing academic journals and running international academic and clinical exchanges between Chinese medicine relating associations (including acupuncture) all over the world.

Through academic, clinical and student exchanges or academic training for medical staff going forward, we can expect fruitful results for both sides.
